April 21 - BAC Parent Meeting @ 8:00 a.m.

April 21 - BAC Jeans Fundraiser

April 27 - Family Wellness Night @ 4:30 p.m.

April 29 - Writing Palooza

Dear Carson Parents,

For the last couple of weeks your students have been working on cultural exploration dances which include different countries like Mexico, Egypt, China, etc. This was a way to get them familiar with different cultures besides their own. Students were able to create dances and make posters of their favorite dances that we did. For the month of April, we will be working on Jazz Dance, Line Dances such as the Cha Cha Slide, Salsa, and Improvisation. These dance activities will help student improve their motor and coordination skills. We are working on those skills so that students can become the best dancers they can be! We also are still going over the rules every class period to make sure that my expectations are met for the students.

- Mr Wiley

Dear Carson Parents,

For the month of April, children in all grades will work on the songs for the Spring Assembly. If you enjoyed their performance during the Winter Assembly, now they are working hard to sing in tune and memorize the lyrics for this wonderful upcoming event. In addition, students in 3rd and 4th grade will be introduced to the recorders.

Gerard Cademcian

Dear Parents,

At the Pre K - 2 level, students will be receiving instruction in basic locomotor movements (run, walk, skip, gallop, sliding, hop, jump), beginning jump rope, rhythms, ball skills (throwing, catching, kicking), gymnastics(cart wheels and forward rolls) , and fitness. A variety of equipment is used to aid in instruction, including parachutes, scooters, balls, scarves, bean bags, and ropes.

At the 3—4 level, we will make up one week of basketball due to P.A.R.C.C. testing. There is great emphasis placed on the overhand throwing motion and the various sport skills that incorporate this skill. Therefor we will be practicing this skill in order for the students to be successful and confidant in every sport they participate in. Students will also engage in lessons on catching, striking, kicking, manipulating objects, rhythms, gymnastics, fitness, cooperative activities, and on playing low organized games and developing strategies to be successful.

I feel very lucky that the students have been so excited about gym all school year! They are the best part of every day for me .-Mr. Zughayer

Dear Carson Parents and Friends,

Pre-Kindergarteners through first grade students will be exploring the notions of composition, color theory, and various applications through painting without paintbrushes. Second through fourth graders are participating in a closer study of the Elements and Principles of Art and Design. For second grade, this means lessons practicing each Element or Principle. For third and fourth graders, we will continue to use collaborative Surrealist processes to understand these terms. All students will continue to look at art that explains these essential artistic ideas.

Ms. Cornell

Dear Parents,

This month in computers we will be focusing on time. For the younger grades that means reading a clock and beginning to tell time to the half hour and quarter hour. For the older students that means finding elapsed time and using time to help solve real world word problems. We will be using different programs such as ST Math, Khan Academy and Brainpop. We will continue working on becoming the best digital citizens we can be, by practicing responsible online searches as well as discuss webpages that are appropriate and can help us to learn.

Thank you for you being awesome parents!

-Mrs. Jacknow
